

## APPENDIX 5: CHEMICAL PROTOCOL REVIEW

Before using certain chemical agents, Research Safety Committee (RSC) approval must be obtained. The principal investigator/laboratory supervisor is responsible for obtaining approval before the initiation of any procedure involving the referenced chemicals. The five-step RSC Protocol Review process is as follows:

### 1. Determine if the Chemical requires Chemical Safety Committee Review and Approval

The Research Safety Committee of UHCL reviews any chemical agent listed in the Mandatory Protocol Review Chemical List; however, any agent not found to be on the list may meet the criteria based on specific toxicological (LD50, LC50) data. The **Mandatory Protocol Review Chemical List** is found at the back of this appendix. A protocol is required to be evaluated by the Research Safety Committee if it meets the following criteria:

#### A. Select Carcinogens

A select carcinogen is any substance which meets one of the following criteria:

- It is listed under Group 1 (“carcinogenic to humans”) or Group 2A (“probably carcinogenic to humans”) by the International Agency for Research on Cancer monographs (IARC); or
- It is listed under the category, “Known to be Human Carcinogens” in the Annual Report on Carcinogens published by the National Toxicology Program (NTP);

#### B. Select Agent Toxins and Other Biological Toxins

Select Agent Toxins are biological agent toxins that have the potential to pose a severe threat to public health and safety. The U.S. Centers for Disease Control and Prevention (CDC) and U.S. Department of Agriculture (USDA) oversee the National Select Agent Registry program.

#### C. Pesticides

A pesticide is defined as “any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest” by the Federal Insecticide, Fungicide, and Rodenticide Act. The U.S. Environmental Protection Agency oversees the regulation of pesticides.

#### D. Explosives/Pyrophoric chemicals

An explosive is defined as “any chemical compound, mixture, or device which is designed to function by an explosion that is substantially instantaneous with the release of gas and heat” by the U.S. Department of Transportation. Explosives are regulated by the Bureau of Alcohol, Tobacco, Firearms, and Explosives. Chemicals that form peroxides over time can become explosive as well if not tested and handled properly.

"Pyrophoric" means a chemical that will ignite spontaneously in air at a temperature of 130 0 F (54.4 0 C) or below, as defined by OSHA (29 CFR 1910.1200(c)).

#### **E. Poison Gases**

Gases that are known to be poisonous by inhalation are listed under Class 2.3 of the US DOT Hazardous Materials Table

#### **F. Antineoplastic Agents**

Antineoplastic agents are chemotherapeutic agents that control or kill cancer cells, as defined by NIOSH.

#### **G. Highly Toxic**

Chemical agents that are classified as “highly toxic” are substances that have a high degree of acute toxicity. Such agents meet the following criteria:

- Chemical has a median lethal dose (LD50) of 50 milligrams or less when administered orally to rats [LD50 < 50 mg/kg]; or
- Chemical has a median lethal dose (LD50) of 200 milligrams or less when administered by continuous dermal contact for 24 hours (or less if death occurs within 24 hours) to the skin of rabbits [LD50 < 200 mg/kg]; or
- Chemical has a median lethal concentration (LC50) in the air of 200 parts per million by volume when administered by continuous inhalation for one hour (or less if death occurs within one hour) to rats [LC50 < 200 ppm]

#### **H. Nanoparticles**

The agent is classified as measuring in the nanoscale (1-100 nanometers) or research that utilizes nanoparticles or nanochemistry.

*Note: The Research Safety Committee may require a review of other highly hazardous chemicals that do not fall under any of these categories mentioned above. Please contact EHS at 281-283-2106 for assistance or to verify if a specific chemical agent meets the RSC review requirement.*

### **2. Completion of the form titled “High Risk Chemical Review”**

If a chemical requires committee review, then a “High Risk Chemical Review” form must be completed and submitted to the office of EHS. EHS can assist you with completing the form in conjunction with a consultation.

### **3. Submission and approval by the Research Safety Committee**

Once the appropriate forms are completed and submitted, the Research Safety Committee evaluates the protocol based on the criteria included for the “High Risk Chemical Review”. The Research Safety Committee will then evaluate the protocol and grant approval to use the chemical agent. In some cases, approval may be granted with the stipulation that certain recommendations are adhered to during the protocol.

### **4. Completion of a “Memorandum of Understanding and Agreement (MUA) for the Use of Chemical Agents”**

Once Research Safety Committee approval is granted, then a “Memorandum of Understanding and Agreement (MUA) for The Use of Chemical Agents” is completed. This MUA requires obtaining signatures from the Research Safety Committee Chair, the Chemical Hygiene Officer or their designee, and the Principal Investigator.

**5. Renewal of approved protocols**

All approved protocols go through a complete review every three years. If there are no significant changes, then the MUA will be resigned and the project may continue until the next review cycle. Any significant changes in the protocol, such as the introduction of a different chemical, increased quantities, or different engineering controls, will trigger the requirement for an immediate full review.

***THE MANDATORY PROTOCOL REVIEW CHEMICAL LIST FOLLOWS ON THE NEXT PAGE.***

**LIST OF CARCINOGENS MANDATING CHEMICAL PROTOCOL REVIEW**

CAS No	Agent	CAS No	Agent
000079-06-1	Acrylamide	013909-09-6	1-(2-Chloroethyl)-3-(4-methylcyclohexyl)-1- nitrosoourea (Methyl-CCNU, Semustine)
023214-92-8	Adriamycin	000095-69-2	4-Chloro-ortho-toluidine
001402-68-2	Aflatoxins (naturally occurring mixtures of)	054749-90-5	Chlorozotocin

000484-20-8	5-Methoxypsoralen	029767-20-2	Teniposide
000101-14-4	Methylenebis(chloroaniline) (MOCA)	001746-01-6	2,3,7,8-Tetrachlorodibenzo-para-dioxin
000075-09-2	Methylene chloride	000127-18-4	Tetrachloroethylene
000066-27-3	Methyl methanesulfonate	000052-24-4	Thiotepa
000070-25-7	N-Methyl-N'-nitro-N-nitrosoguanidine (MNNG)	000095-53-4	ortho-Toluidine
000684-93-5	N-Methyl-N-nitrosourea	000299-75-2	Treosulfan
	MOPP and other combined chemotherapy including alkylating agents	000079-01-6	Trichloroethylene
000505-60-2	Mustard gas (Sulfur mustard)	000096-18-4	1,2,3-Trichloropropane
000091-59-8	2-Naphthylamine	000126-72-7	Tris(2,3-dibromopropyl) phosphate
	Nickel compounds	000051-79-6	Urethane (see Ethyl carbamate)
000051-75-2	Nitrogen mustard	000593-60-2	Vinyl bromide
016543-55-8, 064091-91-4	N'-Nitrosornicotine (NNN) and 4-(NNitrosomethylamino)-1-(3-pyridyl)-1-butanone (NNK)	000075-01-4	Vinyl chloride
000055-18-5	N-Nitrosodiethylamine	000075-02-5	Vinyl fluoride

**LIST OF SELECT AGENTS AND OTHER BIOLOGICAL TOXINS MANDATING CHEMICAL  
PROTOCOL REVIEW**

**Select Agent Toxins:**

Abrin
Botulinum neurotoxins
<i>Clostridium perfringens</i> epsilon toxin
Conotoxins
Diacetoxyscirpenol
Ricin
Saxitoxin
Shiga-like ribosome inactivating proteins
Shigatoxin
Staphylococcal enterotoxins
T-2 toxin
Tetrodotoxin

**Other Biological Toxins:**

Cholera Toxin
Diphtheria Toxin
Pertussis Toxin

**LIST OF EXPLOSIVE CHEMICALS (BATF) MANDATING CHEMICAL PROTOCOL REVIEW**

<b>A</b>	Cyclotrimethylenetrinitramine [RDX].
Acetylides of heavy metals.	<b>D</b>
Aluminum ophorite explosive.	DATB [diaminotrinitrobenzene].
Amatex.	DDNP [diazodinitrophenol].
Amatol.	DEGDN [diethyleneglycol dinitrate].
Ammonal.	Dimethylol dimethyl methane dinitrate composition.
Ammonium nitrate explosive mixtures (cap sensitive).	Dinitroethyleneurea.
Ammonium nitrate explosive mixtures (non-cap sensitive).	Dinitroglycerine [glycerol dinitrate].
Ammonium perchlorate	Dinitrophenol.
Ammonium picrate [picrate of ammonia, Explosive D].	Dinitrophenolates.
Ammonium salt lattice with isomorphously substituted inorganic salts.	Dinitrophenyl hydrazine.
ANFO [ammonium nitrate-fuel oil].	Dinitroresorcinol.
Azide explosives.	Dinitrotoluene-sodium nitrate explosive mixtures.
<b>B</b>	DIPAM [dipicramide; diaminohexanitrobiphenyl].
Baranol.	Dipicryl sulfone.
Baratol.	Dipicrylamine.
BEAF [1, 2-bis (2, 2-difluoro-2-nitroacetoxyethane)].	Display fireworks.
Blasting powder.	DNPA [2,2-dinitropropyl acrylate].
BTNEC [bis (trinitroethyl) carbonate].	DNPD [dinitropentano nitrile].
BTNEN [bis (trinitroethyl) nitramine].	<b>E</b>
BTTN [1,2,4 butanetriol trinitrate].	EDDN [ethylene diamine dinitrate].
Butyl tetryl.	EDNA [ethylenedinitramine].
<b>C</b>	Ednatol.
Calcium nitrate explosive mixture.	EDNP [ethyl 4,4-dinitropentanoate].
Cellulose hexanitrate explosive mixture.	EGDN [ethylene glycol dinitrate].
Copper acetylide.	Erythritol tetranitrate explosives.
Cyanuric triazide.	Ethyl-tetryl.
Cyclonite [RDX].	<b>F</b>
Cyclotetramethylenetetranitramine [HMX].	Flash powder.
Cyclotol.	Fulminate of mercury.

**LIST OF EXPLOSIVE CHEMICALS (BATF) MANDATING CHEMICAL PROTOCOL REVIEW**

Fulminate of silver.	<b>M</b>
Fulminating gold.	Magnesium ophorite explosives.
Fulminating mercury.	Mannitol hexanitrate.
Fulminating platinum.	MDNP [methyl 4,4-dinitropentanoate].
Fulminating silver.	MEAN [monoethanolamine nitrate].
<b>G</b>	Mercuric fulminate.
Gelatinized nitrocellulose.	Mercury oxalate.
Gem-dinitro aliphatic explosive mixtures.	Mercury tartrate.
Guanyl nitrosamino guanyl tetrazene.	Metriol trinitrate.
Guanyl nitrosamino guanylidene hydrazine.	Minol-2 [40% TNT, 40% ammonium nitrate, 20% aluminum].
Guncotton.	MMAN [monomethylamine nitrate]; methylamine nitrate.
<b>H</b>	Mononitrotoluene-nitroglycerin mixture.
Hexanite.	<b>N</b>
Hexanitrodiphenylamine.	NIBTN [nitroisobutametrial trinitrate].
Hexanitrostilbene.	Nitrated carbohydrate explosive.
Hexogen [RDX].	Nitrated glucoside explosive.
Hexogene or octogene and a nitrated N-methylaniline.	Nitrated polyhydric alcohol explosives.
Hexolites.	Nitric acid explosive mixtures.
HMTD [hexamethylenetriperoxidodiamine].	Nitro aromatic explosive mixtures.
HMX [cyclo-1,3,5,7-tetramethylene 2,4,6,8-tetranitramine; Octogen].	Nitrogelatin explosive.
Hydrazinium nitrate/hydrazine/aluminum explosive system.	Nitrogen trichloride.
Hydrazoic acid.	Nitrogen tri-iodide.
<b>K</b>	Nitroglycerine [NG, RNG, nitro, glyceryl trinitrate, trinitroglycerine].
KDNBF [potassium dinitrobenzo-furoxane].	
<b>L</b>	Nitroglycide.
Lead azide.	Nitroglycol [ethylene glycol dinitrate, EGDN].
Lead mannite.	Nitroguanidine explosives.
Lead mononitroresorcinate.	Nitronium perchlorate propellant mixtures.
Lead picrate.	Nitrourea.
Lead salts, explosive.	<b>O</b>
Lead styphnate [styphnate of Pb, Pb trinitroresorcinate].	Octogen [HMX].
Liquid nitrated polyol and trimethylolethane.	Octol [75 percent HMX, 25 percent TNT].

**LIST OF EXPLOSIVE CHEMICALS (BATF) MANDATING CHEMICAL PROTOCOL REVIEW**

<b>P</b>	Silver tetrazene
PBX [plastic bonded explosives].	Sodatol.
Pentolite.	Sodium amatol.
Perchlorate explosive mixtures.	Sodium azide explosive mixture.
Peroxide forming chemicals	Sodium dinitro-ortho-cresolate.
PETN [nitropentaerythrite, pentaerythrite tetranitrate, pentaerythritol tetranitrate].	Sodium nitrate explosive mixtures.
Picramic acid and its salts.	Sodium nitrate-potassium nitrate explosive mixture.
Picramide.	Sodium picramate.
Picrate explosives.	Styphnic acid explosives.
Picratol.	<b>T</b>
Picric acid	Tacot [tetranitro-2,3,5,6-dibenzo- 1,3a,4,6a tetrazapentalene].
Picryl chloride.	TATB [triaminotrinitrobenzene].
Picryl fluoride.	TATP [triacetonetriperoxide].
PLX [95% nitromethane, 5% ethylenediamine].	TEGDN [triethylene glycol dinitrate].
Polynitro aliphatic compounds.	Tetranitrocarbazole.
Polyolpolynitrate-nitrocellulose explosive gels.	Tetrazene [tetracene, tetrazine, 1(5-tetrazoly)-4-guanyl tetrazene hydrate].
Potassium chlorate and lead sulfocyanate explosive.	Tetryl [2,4,6 tetranitro-N-methylaniline].
Potassium nitrate explosive mixtures.	Tetrytol.
Potassium nitroaminotetrazole.	TMETN [trimethylolthane trinitrate].
Pyrotechnic compositions.	TNEF [trinitroethyl formal].
PYX [2,6-bis(picrylamino)]-3,5-dinitropyridine.	TNEOC [trinitroethylorthocarbonate].
<b>R</b>	TNEOF [trinitroethylorthoformate].
RDX [cyclonite, hexogen, T4, cyclo-1,3,5,-trimethylene- 2,4,6,-trinitramine; hexahydro-1,3,5-trinitro-S-triazine].	TNT [trinitrotoluene, trotyl, trilitite, triton].
<b>S</b>	Torpex.
Salts of organic amino sulfonic acid explosive mixture.	Tridite.
Silver acetylde.	Trimethylol ethyl methane trinitrate composition.
Silver azide.	Trimethylolthane trinitrate-nitrocellulose.
Silver fulminate.	Trimonite.
Silver oxalate explosive mixtures.	Trinitroanisole.
Silver styphnate.	Trinitrobenzene.
Silver tartrate explosive mixtures.	Trinitrobenzoic acid.

**LIST OF EXPLOSIVE CHEMICALS (BATF) MANDATING CHEMICAL PROTOCOL REVIEW**

Trinitrocresol.	Tritonal.
Trinitro-meta-cresol.	U
Trinitronaphthalene.	Urea nitrate.
Trinitrophenetol.	X
Trinitrophenol.	Xanthomonas hydrophilic colloid explosive mixture.
Trinitroresorcinol.	

**LIST OF US DOT COMPRESSED POISON GASES (49 CFR 172.101) MANDATING CHEMICAL PROTOCOL REVIEW**

Arsine	Hydrogen iodide
Boron trichloride	Hydrogen selenide
Boron trifluoride	Hydrogen sulfide
Bromine chloride	Methyl bromide
Carbon monoxide	Methyl mercaptan
Carbonyl fluoride	Methylchlorosilane
Carbonyl sulfide	Nitrosyl chloride
Chlorine	Perchloryl fluoride
Chlorine pentafluoride	Phosgene
Cyanogen	Phosphine
Cyanogen chloride	Phosphorus pentafluoride
Diborane	Selenium hexafluoride
Dichlorosilane	Silicon tetrafluoride
Dinitrogen tetroxide	Stibine
Ethylene oxide	Sulfur dioxide
Fluorine	Sulfur tetrafluoride
Germane	Sulfuryl fluoride
Hexaethyl tetraphosphate	Tellurium hexafluoride
Hexafluoroacetone	Trifluoroacetyl chloride
Hydrogen bromide	Trifluorochloroethylene
Hydrogen chloride	Tungsten hexafluoride

**LIST OF ANTINEOPLASTIC AGENTS MANDATING CHEMICAL PROTOCOL REVIEW**

<b>Drug</b>	<b>Drug</b>	<b>Drug</b>
Aldesleukin	Floxuridine	Nilutamide
Alemtuzumab	Fludarabine	Oxaliplatin
Altretamine	Fluorouracil	Paclitaxel
Amsacrine	Flutamide	Pegaspargase
Anastrozole	Fulvestrant	Pentostatin
Arsenic trioxide	Gemcitabine	Perphosphamide
Asparaginase	Gemtuzumab ozogamicin	Pipobroman
Azacitidine	Goserelin	Piritrexim isethionate
Bexarotene	Hydroxyurea	Plicamycin
Bicalutamide	Ibritumomab tiuxetan	Prednimustine
Bleomycin	Idarubicin	Procarbazine
Busulfan	Ifosfamide	Raltitrexed
Capecitabine	Imatinib mesylate	Streptozocin
Carboplatin	Interferon alfa-2a	Tamoxifen
Carmustine	Interferon alfa-2b	Temozolomide
Chlorambucil	Interferon alfa-n1	Teniposide
Cisplatin	Interferon alfa-n3	Testolactone
Cladribine	Irinotecan HCl	Thioguanine
Cyclophosphamide	Leflunomide	Thiotepa
Cytarabine	Letrozole	Topotecan
Dacarbazine	Leuprolide acetate	Toremifene citrate
Dactinomycin	Lomustine	Tositumomab
Daunorubicin HCl	Mechlorethamine	Triptorelin
Denileukin	Megestrol	Uracil mustard
Docetaxel	Melphalan	Valrubicin
Doxorubicin	Mercaptopurine	Vinblastine sulfate
Epirubicin	Methotrexate	Vincristine sulfate
Estramustine phosphate sodium	Mitomycin	Vindesine
Etoposide	Mitotane	Vinorelbine tartrate
