Discover the Faroes

The lush, green archipelago of 18 islands known as the Faroes were formed by volcanic activity over a few million years, some 55 million years ago. Glaciers carved its captivating cliffs, waterfalls and rocky coastlines. These little-known islands, tucked between Norway and Iceland, were settled by the Norse in the ninth century, and remained isolated for centuries. The Faroese language spoken today derives from Old Norse, which was spoken by the Norsemen who settled the islands 1200 years ago.

The name *Føroyar*, or *Faroe*, is Old Norse for sheep, which continue to outnumber residents by nearly two to one. The steep cliff faces — a hallmark of the islands' geography — are home to thousands of seabirds, and hikers and birdwatchers are drawn to the archipelago. Today, the self-governing Faroe Islands — now part of the Danish realm — continue to attract visitors with their authentic Faroese culture, warm hospitality and breathtaking natural beauty.

Akureyri

Day 7 | June 17

The 100-foot-wide horseshoe-shaped Goðafoss waterfall is a spectacular

sight. The falls are fed by the Skjálfandafljót River, which runs across a lava flow created several thousand years ago by a volcanic eruption. Gaze across the plain and at the thundering falls — whose name means Waterfall of the Gods — perhaps feeling rising mist and thrumming from the rushing water as it falls 40 feet into a placid pool below. Travel to Namaskard, a high-temperature thermal field where the sulfur cauldrons, fumaroles, mud pots and land colored by minerals in shades of red, yellow, green and orange create an otherworldly landscape. Continue to Dimmuborgir to admire and walk among dramatic lava rock formations. The lava field, filled with pillars, towers, caves and other structures, was created by a volcanic eruption

about 2,000 years ago. The strange dark shapes resemble a dark castle, or *Dimmuborgir* in Icelandic. Tonight, join your fellow passengers for a Farewell Reception and Dinner on the ship. (B,L,R,D)
